Advena Limited
Tower Business Centre
2nd Flr, Tower Street
Swatar, BKR 4013
Malta

ATTENTION

Always, *LOCTITE*® and torque to manufacturer specifications.

1. The instructions for this device cover a very specific method of fabrication, and we understand that a multitude of methods could be used. The fabricated device is the sole responsibility of the fabricator.
2. Always use Loctite® Blue 242 on screw threads. Torque between 5 Nm and 8 Nm in even distribution.
3. Tighten the screws after a couple weeks of use, also at follow up appointments, re-Loctite® if needed.
4. Use the 6x20mm (top mounting plate) and 6x22mm (bottom mounting plate) screws provided with typical components for the (CD209S, CD209SS, CD209M, CD209MS, CD209R, CD209RS). In atypical setups, longer screws may be needed. Always use screws class 10.9 or better.

Make sure the screws are all the way through the threaded post holes and flush with the inside of the plate. Be sure the screw length fully seats into face plate not just the post, longer screws may be needed depending on the strut and brace thickness. *See example images below.*

A 6 month limited warranty applies to the Mini Dynamic Strut (CD209S, CD209SS, CD209M, CD209MS, CD209R, CD209RS) go to www.coyote.us for details.

CURBELL
PLASTICS

We typically use Curbell Plastic's - ProComp®
Carbon Reinforced Polypropylene.
