## Attaching Seal Band

**1** With liner on patient position band in desired location.

**2** Mark band location on distal and proximal sides of band.

**3** For unconventional band position mark band in multiple locations.

**4** Wrap the liner with electrical tape or vinyl tape next to the band without over lapping it.

**5** Tape off both ends of the band.

**6** Remove the band

**7** Add extra tape to protect a wider area.

**8** Put a bead of silicone adhesive around the liner about the thickness of a pencil.

**9** Smooth the silicone out with a tongue depressor. Make sure to saturate the material.

**10** Check the edges for areas that need more silicone adhesive.

**11** Smooth the silicone out with a tongue depressor. Make sure to saturate the material.

**12** Check the edges for areas that need more silicone adhesive.

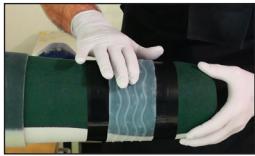

**13** Smooth the silicone out.

**14** Carefully place the seal band over the glued area.

**15** Center the band with tape to the edges.

**16** Push the air bubbles out from under the band

**17** Remove the tape from the liner.

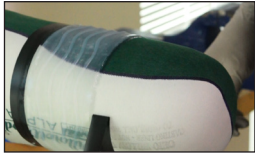

**18** Create a seal band edge with silicone adhesive.

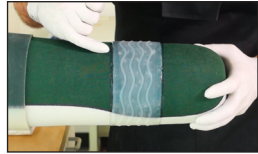

**19** Roll tape next to band edge approximately 1/4 inch space from band.

**20** Smooth silicone into fabric and band. Making a sealed edge.

**21** Remove tape.

**22** Check your work and let the silicone set up for at least two hours before putting it on patient.
